Subject: Congressman Gianforte inquiry - water quality testing in Anaconda Smelter SF site
Attachments: GianforteInquiryAL-17-001-1622.pdf

Hi All,

Please see attached an inquiry from Congressman Gianforte, in response to constituents' concerns about differences in how water quality testing is performed to meet state vs. federal standards. Specifically, the constituents are concerned that federal standards require filtering of particulates before testing the water for heavy metals, and the Montana protocol tests the water including the particulate matter.

Please advise on the best person to respond to this inquiry, which is a controlled correspondence. I understand that Robert Moler is out until Sept. 5th.

Best,

Jody
